

Right by your Side

I am not so sure where all the pain came from
One night I find I'm running from you
And it ends with my head in my hands

All the tears now match the years
All the love that disappeared

Perpetration at the intersection of our trust
By the time I return I can't even remember your smell
But it comes back

All the tears now match the years
All the love that disappeared
I am alive and stepping I to the light

I am alive and stepping into the light to be right by your side
I am alive stepping into the light to be right by your side

Right by your side
Right by your side
